"Inclusive Safety Leadership"

Learning Objectives:

1. Gain a better understanding of their role and the fundamentals of Safety Leadership.
2. Apply Safety Leadership concepts unilaterally.
3. Obtain a clearer understanding of expectations and effective leadership style for a cultural transition in EHS striving for Safety to be a Core Value.
4. Be equipped with the tools to gain buy-in and motivate employees towards individual ownership for Safety.

12:15 pm to
1:15 pm

BUFFET LUNCH – W/VENDORS & SPONSORS

1:15 pm to
2:15 pm

ROOM A

**"THE Most Dangerous
thing your employee can
do..... Drive A Vehicle"**

Mark Woodward
Senior Safety &
Risk Trainer
MEM

- Work-related crash data – We'll back up our assertion that driving is the most dangerous thing employees do.
- Basic principles of an incident / injury prevention program that actually works because it focuses on people and facts. Compliance will not be discussed. We're only discussing "above and beyond" activities that focus on people.

ROOM B

**Disruptive Technology and
Cloud Based Instrumentation**

Tony Coco
Owner, Archview Servies

This session will review some of the newest developments in technology that work to break traditional paradigms in EH&S instrumentation, including; real-time silica monitoring, optical gas sensing technologies and connected worker analytics.

Monday

4532 S Lindbergh Blvd, St. Louis, MO 63127
